

Garden of Scars.

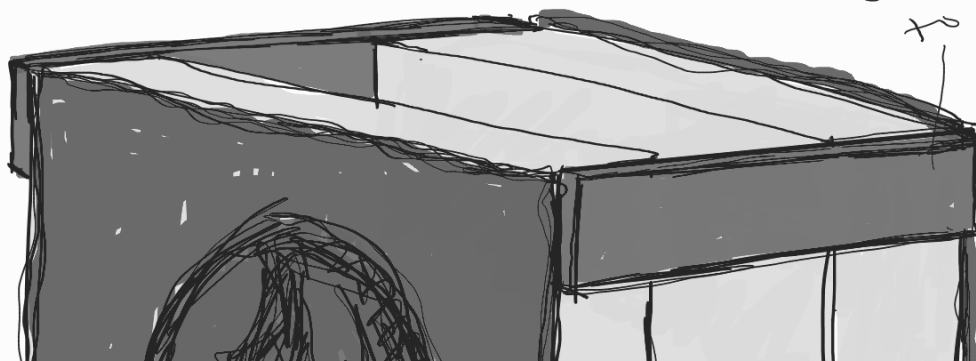

Possible
structural
supports.

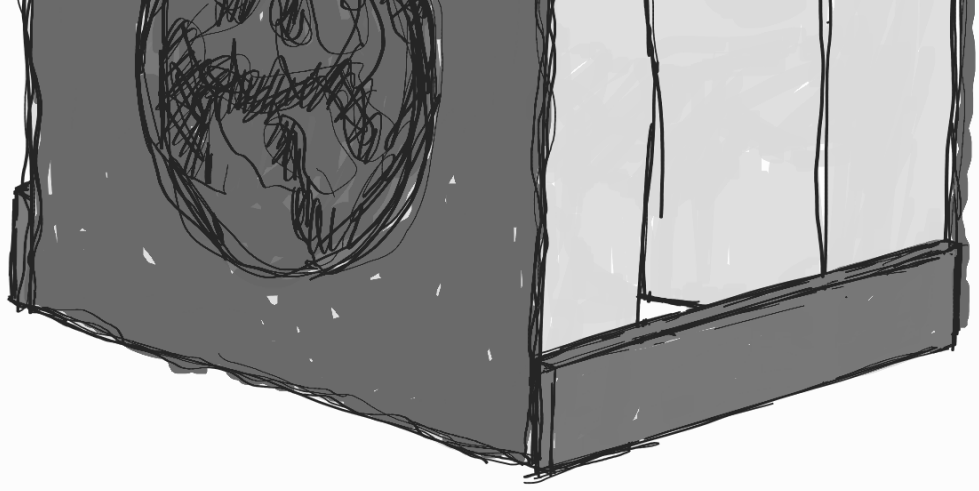

bricks (soil), residue of materials.

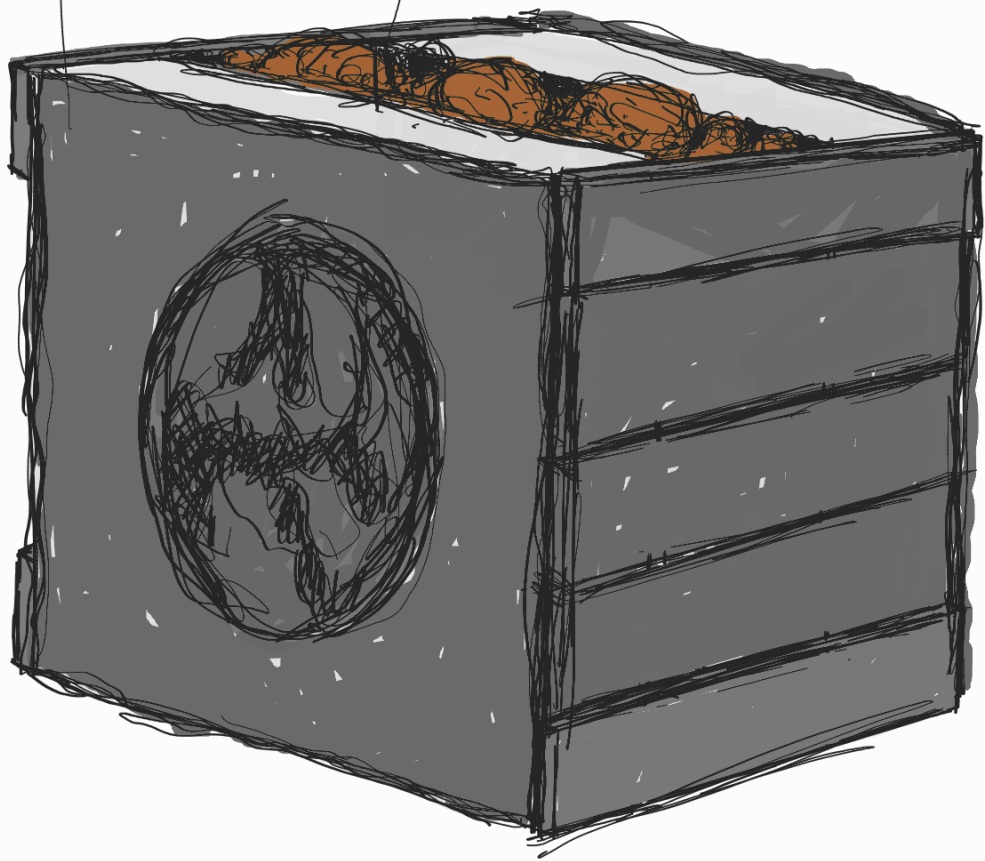

wooden planks
to hold
carts
together.

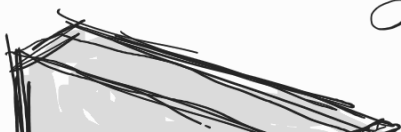

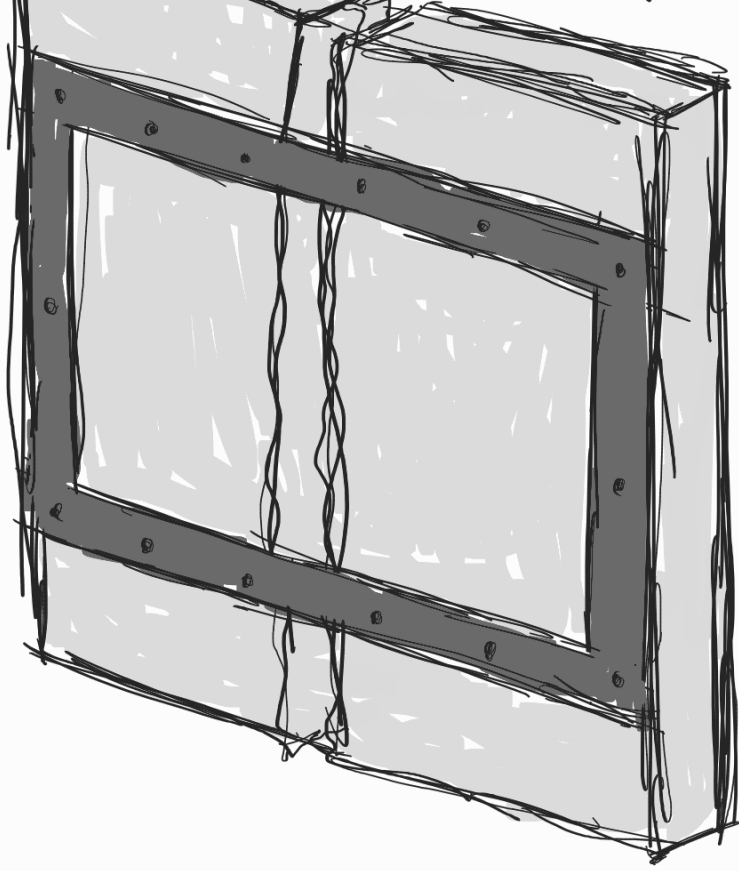

monlds

soil/Residues from forts

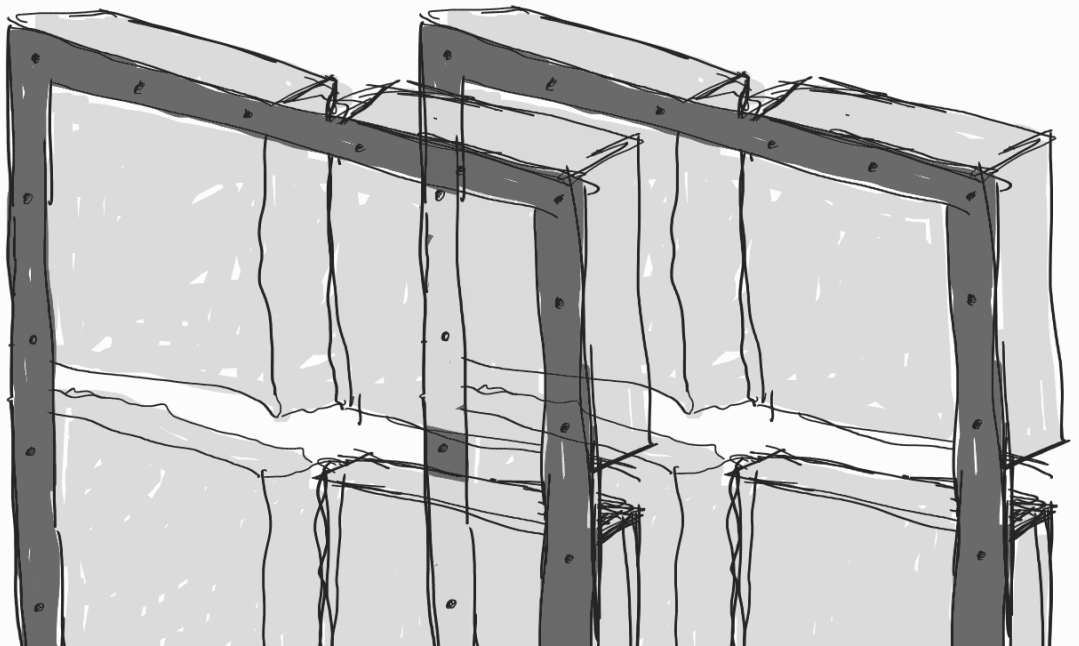

Joining 2 separate casts
together with a little
opening in the middle.

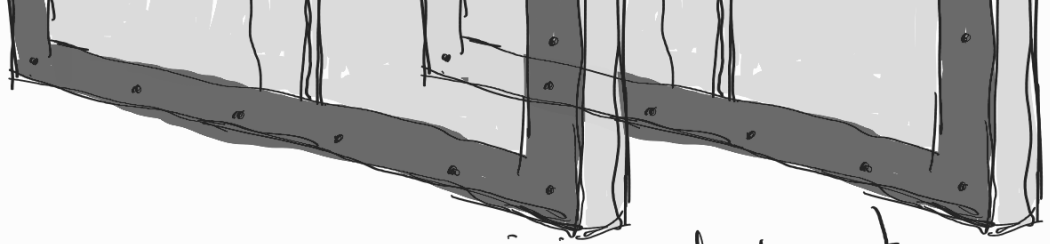

Notes

- make 50-100 new moulds in the oude kerk.
- Get old wood in Amsterdam for supporting structural forms on the casts and moulds standing up straight in the church.
- Sending 80 moulds back to Amsterdam with wooden moulds. (Tamerle).

Combining different
casts.

Bats within casts
and moulds.
