Poems for Earthlings

Adrián Villar Rojas

20 November 2019

Poems for Earthlings is an immersive installation, developed especially for the Oude Kerk. As part of his artistic process, Adrián Villar Rojas immersed himself completely in its environment. The result, achieved with the help of many hands, is an installation in which the visitor is invited to observe the world from a post-human point of view.

Click [here](#) to RSVP. Please note: due to the limited accesibility of the installation, we ask you to select a time slot.
